

GOWTHAM PALANICHAMY

Senior Frontend / Angular Developer | Angular | TypeScript | RxJS | NgRx | Micro Frontend

Bangalore, India | +91 86604 64527 | gowthampalanichamy@gmail.com | linkedin.com/in/gowtham-palanichamy

PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience building scalable Angular applications for e-waste, battery, and glass recycling compliance platforms. Strong expertise in Angular, TypeScript, JavaScript (ES6+), RxJS, NgRx, REST API integration, reusable component architecture, modular frontend development, and performance optimization. Experienced in responsive enterprise applications, cross-browser reliability, code reviews, mentoring, and Agile/Scrum delivery.

40%+ Faster Load Times | 20–30% Less Duplicate Code | 10+ Modules Standardized | 4+ Concurrent Projects | 7+ Years Angular

CORE SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, SCSS

State Management: NgRx Store, Effects, Selectors, reactive state architecture

Micro Frontend & Architecture: Micro Frontends, Module Federation, modular frontend architecture, reusable component architecture

Angular: Reactive Forms, Services, Dependency Injection, Routing, Guards, Lazy Loading, Standalone Components, Signals

UI Frameworks & Libraries: Bootstrap, Tailwind CSS, Angular Material, HighCharts, Chart.js

API & Integration: REST API, HTTP/JSON integration, API validation, Postman

Performance: Lazy Loading, Code Splitting, Caching Strategies, Lighthouse Audits, Angular Performance Optimization

Testing & Quality: Manual Testing, Exploratory Testing, Cross-Browser QA, Release Validation

Tools & DevOps: Git, GitHub, Bitbucket, VS Code, WebStorm, CI/CD

Practices: Agile/Scrum, Code Reviews, Mentoring, Cross-Functional Collaboration

WORK EXPERIENCE

Software Engineer, Front End — Karo Sambhav Private Limited, Bangalore

Oct 2018 – Present | E-waste, battery, and glass recycling compliance & tracking platforms

- Engineered and maintained scalable Angular tracking dashboards for e-waste, battery, and glass recycling programs used by internal teams and clients.
- Architected a reusable modular component library using Angular, TypeScript, RxJS, Bootstrap, and SCSS; adopted across 10+ modules, reducing duplicate code by approximately 20–30%.
- Developed modular frontend structures and reusable UI patterns suitable for enterprise-scale and micro frontend-oriented applications.
- Integrated and validated REST APIs connecting Angular dashboards with backend recycling and compliance systems; used Postman for endpoint testing.
- Improved dashboard load times by over 40% through lazy loading, code splitting, and caching; used Lighthouse audits for performance optimization.
- Built responsive interfaces with cross-browser reliability across complex business workflows and data-heavy dashboards.
- Automated end-to-end report and mailer generation for compliance and client communication using scheduled, templated outputs.
- Coordinated 4+ concurrent projects across e-waste, battery, and glass recycling verticals, aligning priorities and supporting on-time delivery.
- Led manual and exploratory testing before releases, supported production issue resolution, and participated in code reviews.
- Mentored 1–2 junior developers through code reviews and technical guidance while promoting Agile/Scrum practices and Git-based version control.

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology

Kodaikanal Institute of Technology, Tamil Nadu | Aug 2010 – May 2014 | CGPA: 7.34 / 10

LANGUAGES

English — Professional Working Proficiency | Tamil — Native
